

BACKTOWORK

A program of **GUIDING LIGHT**

PLAN OF ACTION

The following three interventions have been implemented to increase the rate of program completion:

Job Coach Sessions

Maintaining employment and developing the skills in which to resolve conflict and be a good employee are important pieces of a stable, self-sufficient life. Clients will have three different times to meet with a highly qualified human resources professional to develop their skills and abilities in maintaining and succeeding in their employment.

Relapse Prevention Plans

Clients with any history of substance use disorder will create a relapse prevention plan with the support and assistance of their case manager. This process will produce prevention document that the client reviews with the case manager each meeting.

Housing Assistance Referrals

Increase client access to community partners who specialize in housing assistance. This collaborative effort introduces clients to other resources and empowers them to find stable, secure housing that fits their situation.
